FMM 9120 CODING STRUCTURE

PART I GENERAL

9121-1 GENERAL FORMAT OF THE AWCS

The Agencywide Coding Structure (See FMM Appendix 9121-1A) consists of two basic sections: Programmatic/Nonprogrammatic and Fiscal/Statistical.

a. PROGRAMMATIC/NONPROGRAMMATIC

- b. The Programmatic/Nonprogrammatic portion of the AWCS is divided into two sections. One, which is for Headquarters use only, is used primarily to develop data at the program level and Headquarters office level; the other section is designed for the uniform identification and reporting of NASA projects and nonprogrammatic activity by NASA Installations. See FMM 9020-4 for the definition of "program" and "project" as used in this instruction.
 - (1) Headquarters Use Only. This area of the structure is utilized by Headquarters to extract selected data for various output reports. This is accomplished through the use of cross-reference techniques which allow the compilation of additional information based on the relationship of data already in the Headquarter's file. An example would be the generation of program totals which are based on the relationship of projects to Budget Line Item codes. See FMM 9121-10 thru 12 for specific details.
 - (2) NASA Installation Reporting (Digits 1-11). This area of the structure is designed to accommodate the reporting of project and nonprogrammatic data by NASA Installations. At present, there is no Headquarters requirement for the submission of data at all 11 positions; however, NASA Installations should have the capability of reporting to the 11-digit level if required. There is no authorization for NASA Installations to use this field for local accounting purposes.
 - (a) R&D, SFCDC, R&PM, SAT, HSF and MS Appropriations. Digits 1-3 designate the Unique Project Number (UPN) or Nonprogrammatic Code. See item (c) for designation of major facility projects under SAT, HSF and MS appropriations. See FMM 9121-20 for specific details.

Digits 4-11 designate subsidiary coding for use where detail is necessary below the 3-digit level. See FMM 9121-21 for specific details.

NASA Financial Management Manual

- (b) Special Coding Application for Program Management. Code 89 may be used in digits 4 and 5 or 6 and 7 to identify program management costs which cannot be related on a practical basis to lower level subsidiary codes of a project. It may be used for direct labor (Fund Source 1) and related travel (Fund Source 2) and charges for R&D, SFCDC, HSF, MS and SAT where advance approval has been obtained from the Program Office.
- (c) C of F . Digits 1-4 are designated as the Facility Project Number (FPN) which consists of site location or type of work (digits 1-2) and serial number (digits 3-4). See FMM 9121-30 for specific details.

Digits 5-11 designate subsidiary breaks. There are no reporting requirements specified for these digits at this time.

c. **FISCAL/STATISTICAL**

The Fiscal/Statistical portion of the AWCS is comprised of those data elements which are reported in digits 12-31. Detailed definitions are provided in FMM 9121-50 thru 57 for the following:

<u>DATA ELEMENT</u>	<u>AWCS DIGITS</u>
Installation	12-13
IMS Functional Code	14-19
Program Year	20-21
Method of Authorization	22-23
Reimbursable Code	24-25
Fund Source	26-27
Object Class	28-31

Fund Source Code	2 positions	26-27
Object Class Code	4 positions	28-31

NASA Financial Management Manual

PART II CODING FOR NASA HEADQUARTERS USE ONLY

9121-10 BUDGET LINE ITEMS (PROGRAMS) AND OPERATING ACCOUNTS

This 2-digit code, developed at Headquarters by a cross-reference technique for inclusion in output reports, identifies the budget line items (programs) which appear in the President's Budget. Operating accounts are used in internal budgetary administration. The data collected in operating accounts is incorporated into budget line items (programs) in the formal budget presentation. Data for this field will be developed at the NASA Headquarters level and will not involve coding by Installations. A listing of budget line items (programs) and operating accounts is provided in FMM Appendix 9121-10A.

9121-11 COGNIZANT HEADQUARTERS OFFICE CODES

This 3-digit code, developed at Headquarters by a cross-reference technique for inclusion in the output reports, identifies the Headquarters cognizant office. The Headquarters cognizant office is the organization responsible for program management including the issuance of Resources Authority Warrants (NASA Forms 506A and 506A-R) within the policies and principles set out in appropriate NMI's and related NHB's. A listing of Headquarters cognizant offices codes is provided in FMM Appendix 9121-11A.

9121-12 CLASSIFICATION OF NASA BUDGET BY FUNCTION/SUBFUNCTION CATEGORIES IN THE PRESIDENT'S BUDGET

All Federal programs are identified in the President's Budget by functional and subfunctional categories, a requirement of the Committees on Appropriations and the Budget in each House. This functional/subfunctional classification permits presentation of budget authority and outlays in terms of national needs. While changes in the category structure occur from time-to-time, the functional/subfunctional categories and related 3-digit codes, applicable to the NASA budget, are shown below:

250	General Science, Space, and Technology
252	Space Flight, Research and Supporting Activities
254	Space Science, Applications and Technology
255	Supporting Space Activities
400	Transportation
402	Air Transportation

These functions are comprised of the budget line items in the NASA Authorization Act.

NASA Financial Management Manual

Detailed accounting data supporting the Agency's yearend certification is summarized by the above categories by appropriation account for inclusion in various budget exhibits and analyses submitted by the Headquarters Budget Operations Division to OMB for use in preparing the President's budget. The categories and codes are reflected in the annual document entitled, "The Budget of the United States Government."

These categories should not be confused with the FMS functional and subfunctional coding structure used internally within NASA.

NASA Financial Management Manual

9121-10A LISTING OF BUDGET LINE ITEMS (BLI) AND OPERATING ACCOUNTS

BLI	Description
------------	--------------------

Nonprogrammatic Operating Account

- | | |
|----|---|
| 10 | Includes center support, other nonprogrammatic activities, and carrier accounts (financed under the Research and Development (R&D), Space Flight, Control and Data Communications (SFCDC), Human Space Flight (HSF), Science, Aeronautics and Technology (SAT), and Mission Support (MS) appropriations.) Each carrier account is treated as a unique project. (Carrier accounts are not used in the budgetary accounts, but are related to benefiting programs.) |
|----|---|

Research and Development Budget Line Items and Operating Accounts (Py 94 and Prior)

- | | |
|----|---|
| 21 | Transatmospheric R&T |
| 22 | Space Research & Technology |
| 23 | Aeronautical Research & Technology |
| 25 | Advanced Concepts and Technology |
| 30 | Television Dissemination Capability Development |
| 40 | Operating Account |
| 42 | Academic Programs |
| 43 | Minority University Research Program |
| 45 | Energy Technology |
| 48 | Space Station |
| 51 | Tracking and Data Advanced Systems |
| 60 | Exploration |
| 61 | Mission to Planet Earth |
| 64 | Commercial Use of Space |
| 65 | Technology Utilization |
| 66 | Safety, Reliability, and Quality Assurance |
| 84 | Planetary Exploration |
| 85 | Physics and Astronomy |
| 88 | Life and Microgravity Sciences and Applications |
| 96 | Space Transportation Capability Development |

Space Flight, Control and Data Communications Budget Line Items (Py 94 and Prior)

- | | |
|----|---|
| 30 | Television Dissemination Capability Development |
| 31 | Space and Ground Network, Communications and Data Systems |
| 35 | Space Shuttle Production and Operational Capability |
| 37 | Space Transportation Operations |
| 39 | Expendable Launch Vehicles |

NASA Financial Management Manual

Human Space Flight Budget Line Items (Current Programs)

- 38 Space Shuttle
- 48 Space Station
- 94 Russian Cooperation
- 96 Payload Utilization and Operations

Science, Aeronautics and Technology Budget Line Items (Current Programs)

- 23 Aeronautical Research and Technology
- 25 Space Access and Technology
- 31 Mission Communications Services
- 39 Launch Services
- 42 Education Programs
- 43 Minority University Research and Education Program
- 61 Mission to Planet Earth
- 84 Planetary Exploration
- 85 Space Science
- 88 Life and Microgravity Sciences and Applications

Mission Support Budget Line Items (Current Programs)

- 52 Space Communication Services
- 66 Safety, Reliability and Quality Assurance

National Aeronautical Facilities Appropriation

- 26 National Aeronautical Facilities (NAF)

Research and Development Budget Line Items and Operating Accounts (Historical Programs)

- 24 Nuclear Power & Propulsion
- 41 Sustaining University Program
- 50 Special Support
- 62 Earth Resources Operational Systems
- 7A Apollo Applications Experiments
- 70 Mission Analysis Program
- 71 Space Power and Electric Propulsion Systems
- 72 Nuclear Rockets
- 73 Chemical and Solar Power
- 74 Space Vehicle Systems
- 75 Electronics Systems
- 76 Aeronautical Vehicles
- 77 Human Factor Systems
- 78 Chemical Propulsion
- 79 Basic Research Program
- 83 Launch Vehicle Development

PART III CODING FOR R&D, SFCDC, R&PM, HSF, MS AND SAT APPROPRIATIONS (DIGITS 1-11)

9121-20 UNIQUE PROJECT NUMBER (UPN) AND NONPROGRAMMATIC CODES (DIGITS 1-3)

- a. **GENERAL.** A three-digit code is assigned to each R&D, SFCDC, SAT, HSF, and MS project (UPN) or nonprogrammatic activity, where applicable, on a basis which permits a direct relationship to a given Budget Line Item (BLI) appearing in the Agency's justification material supporting the President's budget or an operating account and a designated Headquarters cognizant office code used in internal NASA administration. The programmatic UPN's relate to specific jobs or tasks. Approval of this type of effort in NASA is accomplished through the project approval & RTOP procedures prescribed in the NMI 7000 series. The R&D, SFCDC, HSF, MS, and SAT codes are also utilized to identify related R&PM labor and travel charges that are programmatic in nature. The nonprogrammatic codes relate to essentially non-R&D, SFCDC, HSF, MS, and SAT activity or R&D, SFCDC, HSF, MS, and SAT activity which, at the time the costs are initially incurred, cannot be associated to a specific benefitting activity. Carrier accounts have been established under the R&D, SFCDC, HSF, MS, and SAT Appropriations for this purpose. The UPN coding for center support activity (see FMM 9321-2) is not required unless specified.
- b. Matrixes of assigned UPN codes for the R&D, SFCDC, R&PM, HSF, MS, and SAT appropriations by Program Office and BLI are listed in FMM Appendixes 9121-20A and 9121-20B. The programmatic UPN's are listed by Program Office; the nonprogrammatic codes are listed under the Associate Administrator.

9121-21 UPN SUBSIDIARY CODING (DIGITS 4-7)

- a. The UPN concept described in the preceding paragraph requires subsidiary coding for R&D, SFCDC, HSF, MS, and SAT programmatic and technical management purposes. The subsidiary coding is developed by each program office to facilitate the management of the type of effort under its jurisdiction. The subsidiary coding peculiar to development and space operations projects is classified as system/subsystem in accordance with the project approval and related project development plans. In the research studies and flight experiment fields, the subsidiary coding is in accordance with the RTOP concept. The subsidiary coding may be classified as SRT-R&T subprograms and experiments in accordance with NMI 7100-12 - Standard RTOP Management System.

NASA Financial Management Manual

- b. **SPACE SHUTTLE EXPERIMENTAL PROGRAM.** Space Technology investigations in the Office of Aeronautics, and Energy Technology and Space Science experiments in the Office of Space Science and Applications, were defined in accordance with RTOP policy and the Announcement of Opportunity Programs (AOP) procedures. Requirements for specific subsidiary coding within appropriate UPN's are contained in AOP procedures as outlined in NMI 7100.11.
- c. **MAINTENANCE OF CODES.** The approved codes are maintained in an automated on-line data base system. See FMM 9130 for a description of this system.

9121-22 UPN SUBSIDIARY CODING (DIGITS 8-11)

- a. Reporting at this level is not required at this time.
- b. NASA Installations will, however, maintain the capability of reporting data at this level to Headquarters should future requirements be established.

NASA Financial Management Manual
